James T. Garland

+1 (917) 655-7955 | james.garland@mail.utoronto.ca | jamesgarland.net | 0000-0003-2922-1416

Education

University of Toronto — Toronto, ON, Canada
Ph.D. in Astronomy and Astrophysics — *Sep 2023 – Nov 2028 (Expected)*

- Candidacy achieved in Nov 2025

Haverford College — Haverford, PA, USA
B.Sc. in Physics and Astronomy — *Sep 2018 – May 2022*

- Thesis: *The Interplay of Tides, Bars, and Star Formation in Disk Galaxies*
- Departmental High Honors

Research Experience

University of Toronto — Toronto, ON, Canada
Graduate Student Researcher — *Oct 2023 – Present*

- Working with Professor Laurie Rousseau-Nepton and the SIGNALS collaboration on characterizing extragalactic metallicity fluctuations associated with spiral structures.
- Studying dust extinction in M33 HII regions using CFHT/SITELLE, including mentoring an undergraduate research assistant on data reduction and analysis.

American Museum of Natural History — New York City, NY, USA
Research Assistant — *Jul 2022 – Jul 2023*

- Worked with Dr. Michael Shara and the Condor Array Telescope collaboration on identifying extragalactic novae and low-surface-brightness nova remnants in multi-epoch broad- and narrow-band images.
- Developed an automated source detection, photometry, and classification pipeline to identify transients in multi-epoch images and line-emission sources in multi-wavelength images.
- Used image correlation techniques between Condor and archival data to quantify the expansion of the nova shell around Z Cam.
- Analyzed SALT/RSS longslit spectra of nova super-remnants surrounding KT Eridani and RS Ophiuchi, contributing to publication of both discoveries.
- Collaborated on an HST Cycle 31 proposal to measure extragalactic nova rates.

Haverford College — Haverford, PA, USA
Undergraduate Research Intern (Multiple Internships) — *Sep 2019 – May 2022*

- Worked in the research groups of Professors Karen Masters (four semesters) and Daniel Grin (two semesters), including two 10-week summer internships funded by KINSC fellowship grants.
- Studied the tidal triggering/destruction of bars in galaxies using Galaxy Zoo citizen science data. Incorporated morphological, environmental, and star formation measures to inform a more comprehensive perspective on galaxy evolution.
- Developed mock survey code to generate and observe populations of dark matter haloes under different cosmologies with simulated HI surveys. A manuscript on the limits of galaxy surveys for constraining axion dark matter models is currently in review for publication.
- Presented posters and talks at multiple national, local, collaboration, and collegiate consortium meetings.

Teaching and Outreach Experience

University of Toronto — Toronto, ON, Canada
Teaching Assistant — *Sep 2023 – Present*

- Held tutorials and generated homework questions for AST101 and AST201.
- Organized and ran lab sessions for AST325, AST 326, and AST301.

University of Toronto AstroTours — Toronto, ON, Canada
Co-Director (2024-2025), Volunteer Coordinator, Keynote Co-Director, Volunteer — *Sep 2023 – Present*

- Directed programming, volunteer coordination, and long-term planning as Co-Director.
- Recruited undergraduate and graduate student volunteers.

- Organized the 2024 AstroTours Keynote event.
- Conducted observing sessions, demos, and observatory tours.

Dunlap Institute & Discover the Universe Toronto, ON, Canada
Eclipse Workshop Volunteer *March 2024 – April 2024*

- Led workshops at several Toronto Public Library branches to prepare members of the public for the April 2024 total solar eclipse.

Haverford College Public Observing Haverford, PA, USA
Co-Head (2021-2022), Volunteer *2018 – 2022*

- Organized and ran public events for college and local communities.
- Conducted observing sessions, talks, Q&A sessions, and observatory tours.
- Operated and trained students in the use of 8", 12", and 16" telescopes at Strawbridge Observatory.

Haverford College Haverford, PA, USA
Teaching Assistant *Jan 2021 – May 2021*

- Held office hours, assisted with observing sessions, and graded coursework for Astronomy 101.

Observing Time Awarded

CFHT/SITELLE, Regular (Semester 25B): 6 hr. *Mapping Dust Extinction in M33: A Multi-Wavelength Study of HII Regions with SITELLE.* **PI.**

SALT/RSS, DDT (Semester 2023-1): 3 hr. RS Ophiuchi nova super-remnant spectroscopy. Co-I (PI: M. Shara).

SALT/RSS, DDT (Semester 2022-2): 2.5 hr. KT Eridani nova super-remnant spectroscopy. Co-I (PI: M. Shara).

Awards & Honors

Carl Reinhardt Fellowship (2024): CA$5,000 (increased to CA$7,000 in 2025) per annum for 3 years awarded to a graduate student in the David A. Dunlap Department of Astronomy and Astrophysics.

C. A. Chant Fellowship (2023): CA$8,970 awarded to a graduate student in the David A. Dunlap Department of Astronomy and Astrophysics.

Louis B. Green Prize in Physics and Astronomy (2022): Awarded to the graduating students who go above and beyond in their contributions to research and/or department culture and events.

Chambliss Astronomy Achievement Award, Undergraduate Honorable Mention (2022): Awarded for poster presented at the 240th meeting of the American Astronomical Society.

KINSC Scientific Imaging Contest, Honorable Mention (2022): Awarded for student-submitted images from experiments or simulations that are scientifically intriguing as well as aesthetically pleasing. (*Submission*)

Talks & Presentations

Poster, Olympian Symposium, May 2026. *Stirring the Pot: Spiral-Arm-Induced Star Formation and ISM Enrichment in NGC 628.* (*Poster*)

Talk, Galaxy Memoirs, Aug 2025. *Stirring the Pot: Spiral-Arm-Induced Star Formation and ISM Enrichment in NGC 628.* (*Abstract*)

Talk, McMaster Star Formation Workshop, Aug 2024. *Characterizing Fine Metallicity Fluctuations Across Galactic Structures with SIGNALS.* (*Abstract*)

Poster, CASCA annual meeting, Jun 2024. *Characterizing Fine Metallicity Fluctuations Across Galactic Structures with SIGNALS.* (*Abstract*)

"Flash talk" and poster, 2024 STScI Spring Symposium, Apr 2024. *Characterizing Fine Metallicity Fluctuations Across Galactic Structures with SIGNALS.* (*Abstract*)

Talk, Galaxy Zoo 15th anniversary telecon, Jul 2022. *Exploring the Roles of Galaxy Star Formation and Environment in the Tidal Triggering of Bars.* (*Slides*)

Poster, AAS 240th meeting, Jun 2022. *Exploring the Roles of Galaxy Star Formation and Environment in the Tidal Triggering of Bars.* (*Poster*)

Talk, Galaxy Zoo biweekly telecon, Dec 2021. *Exploring the Roles of Galaxy Star Formation and Environment in the Tidal Triggering of Bars.* (*Slides*)

Talk, 32nd annual Keck Northeast Astronomy Consortium meeting, Sep 2021. *Exploring the Roles of Galaxy Star Formation and Environment in the Tidal Triggering of Bars.* (*Abstract*, *Recording*)

Poster, Haverford KINSC Undergraduate Science Research Symposium, Sep 2021. *Exploring the Roles of Galaxy Star Formation and Environment in the Tidal Triggering of Bars.*

Poster, AAS 237th meeting, Jan 2021. *Can HI Observations of Low-Mass Galaxies Test Ultra-Light Axion Dark Matter?* (*Abstract*, *Poster*)

Poster, Haverford KINSC Undergraduate Science Research Symposium, Oct 2020. *Can We Test Axion Dark Matter Models With Galaxy Surveys?*

Poster, 31st annual Keck Northeast Astronomy Consortium meeting, Oct 2020. *Can HI Observations of Low-Mass Galaxies Test Ultra-Light Axion Dark Matter?* (*Abstract*)

"Lightning talk", 2020 SDSS-IV/V Collaboration Meeting, Jun 2020. *Can HI Observations of Low-Mass Galaxies Test Ultra-Light Axion Dark Matter?*

Skills

Technical: Python, Data Reduction and Analysis, Data Visualization, Optical Telescope Operation, CCD Image Reduction, Observation Planning, Astrophotography

Communications: Proposal Writing, Scientific Writing, Science Communication, Public Outreach

Relevant Coursework

Astronomy (Graduate): Radiation Processes and Gas Dynamics, Observational Techniques, Astrostatistics, Stars, Data Visualization and GPU Programming, Ethics and Practice in Astronomy

Astronomy (Undergraduate): Intro Astrophysics, Observational Astronomy, Multi-Wavelength Astronomy, Galactic Dynamics & Mechanics (mixed undergraduate & graduate), Gravitational Waves, Extragalactic Data Science

Physics (Undergraduate): Fundamental Physics I-II, Waves and Optics, Advanced Quantum Mechanics, Advanced Classical Mechanics, Advanced Electromagnetism

Misc. (Undergraduate): Multivariable Calculus, Linear Algebra, History of Science
